

# Lion11

Lion11 is a fantasy cricket platform where users can create teams, join contests, and track performance. Features include registration, team creation, live match scoring, player stats, and real-time updates. The admin panel manages users, teams, and contests, ensuring smooth operations. I am handling the admin panel and backend processes, while another person is developing the application in Flutter. The aim is to deliver an engaging and interactive cricket fantasy experience.

**Skills and deliverables:- .Net Core, Angular**
